

Guide to CMMC 2.0 Level 2 Certification

Getting Started with CMMC 2.0 Certification Checklist

1. Understand CMMC Levels & Scoping

- Identify which CMMC level applies to your organization (Level 1, 2, or 3)
- Define the assessment scope (systems, assets, environments to be evaluated)

2. Review Official Guidance & Requirements

- Download and review official CMMC guides for your required level
- For Level 1: Review the 15 safeguarding requirements in FAR 52.204-21

3. Conduct a Self-Assessment (Level 1 + some Level 2)

- Perform a self-assessment against CMMC requirements. Take our quiz ([links to quiz](#))
- Document gaps, findings, and remediation needs
- Submit required Level 1 results to SPRS

4. Engage Third Parties When Needed

- Determine if you need support from a consultant or RPO
- For certification (Level 2/3): Schedule with an accredited C3PAO

5. Follow the Correct Assessment Guide

- Download and use the CMMC Assessment Guide for your target level
- Prepare for a formal certification assessment (required for higher levels)

6. Prepare for Artifact Handling & Hashing

- Gather required artifacts
- Follow hashing procedures required for certification reviews

7. Utilize Available Resources

- Reference official linked documents and process guides
- Contact a CMMC expert or RPO (such as CTI) for support or clarification

These steps will help establish a strong foundation as you begin your path toward CMMC certification.
